

Sara Gouveia, Veterinary Surgeon

Sara joined us after practicing in Portugal for a year and a half as a small animal vet. She has always wanted to work as an equine vet and came to Churchfield Vets in 2019 to apply and develop her equine medicine skills and knowledge across all areas of equine practice, whilst also enjoying a role as a small animal vet. She has a wide interest in all aspects of equine practice, and especially equine nutrition and its effect on conditions such as EMS and Poor Performance, and also internal medicine.

Sara enjoys a variety of sports and outdoor pursuits, and has been known to disappear up high mountains on her weekends off.
